

CC&L Alternative Income Fund

Management Report of Fund Performance

For the year ended December 31, 2024

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling us directly at 1.800.939.9674, by writing to us at 1400 - 130 King St. W., P.O. Box 240, Toronto, ON, M5X 1C8 or by visiting our website at www.cclfundsinc.com, or SEDAR at www.sedarplus.ca

Security holders may also contact us using one of these methods to request a copy of the investment fund's interim financial report, proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objective and Strategies

Investment Objectives — The CC&L Alternative Income Fund (the “Fund”) seeks to provide unitholders with long-term returns. The portfolio manager will actively manage a diversified portfolio of primarily global fixed income securities by opportunistically utilizing both long and short positions.

The Fund will engage in short selling, cash borrowing and use derivatives in order to meet its investment objective. The amount of leverage used by the Fund is described in the Investment Strategies section below.

The fundamental investment objective of the Fund cannot be changed without the approval of a majority of the unitholders at a meeting called to consider the change.

Investment Strategies — To achieve the Fund’s investment objectives, the manager, Connor, Clark & Lunn Funds Inc. (“CFI” or the “Manager”) has retained Connor, Clark & Lunn Investment Management Ltd., as portfolio manager, to invest the assets of the Fund with full authority and responsibility for security selection.

To achieve the Fund’s investment objective, the portfolio manager will actively manage a diversified portfolio of primarily global fixed income securities by opportunistically utilizing both long and short positions. The portfolio manager assesses specific investment opportunities based on both top-down and bottom-up analysis. On average, over time, it is expected that for every \$100 invested, the Fund portfolio’s use of leverage will be approximately \$200-\$300. To obtain this leverage, the Fund will engage in short selling, borrowing and use derivatives as described below. The net market exposure of the Fund will typically range between 50% and 250%.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Risk

During the year from January 1, 2024 to December 31, 2024, the risk profile of the Fund was managed in accordance with the goals set out in the simplified prospectus. In the view of the Manager, the risks associated with an investment in the portfolio are adequately described in the simplified prospectus and have not altered as result of subsequent changes in the underlying investments.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Results of Operations

As at December 31, 2024, the Fund held \$30.4 million in total net assets. During the year ended December 31, 2024, investors in Series A units in the Fund experienced a return of 6.26%. The benchmark for the Fund (FTSE Canada 91 Day T-Bill Index) returned 4.92% over the year. The performance of the different series within the funds will vary due to the differences in their expense structures. For specific returns by series, please refer to the “Past Performance” section of this report.

Economic divergences were apparent early in the year, as US economic data releases continued to show above-trend growth, with markets gravitating toward a “soft landing” outcome, or even a return to a period of economic strength. These developments were in contrast to Canada, where inflation releases decelerated and activity indicators pointed to slowing economic growth. However, evidence of slowing economic momentum in the US started to unfold later in the period, with downside surprises in economic releases relative to market expectations. Importantly, inflation releases were ultimately reassuring and helped to alleviate concerns of a reacceleration in inflation, although the path was not linear and led to some market volatility during the period. Central bank activity moved in favour of monetary easing, and the Bank of Canada (BoC) became the first G7 central bank to lower its target interest rate this cycle.

Cooperative data releases affirmed steady deceleration in inflation figures through the third quarter, and markets shifted their focus to softening economic activity. This led to bouts of equity market volatility. These periods of volatility were short-lived, however, as financial markets brought forward their expected timing for – and increased the expected size of – central bank interest rate reductions. The significant event during the quarter was the US Federal Reserve’s (Fed’s) outsized interest rate reduction that was introduced to kick off the Fed’s easing cycle. The Fed reduced its target interest rate by an unusually large 50 basis points (bps), indicating a concerted effort to prevent further deterioration in the labour market. Yield curves normalized late in the third quarter for the first time in over two years. In the fourth quarter, robust economic activity, coupled with stable inflation figures, a Republican victory in the US election and easing monetary policy collectively bolstered market sentiment in the fourth quarter. Equity markets experienced significant gains in November, reaching new highs in early December before experiencing some fluctuations towards the end of the quarter. While inflation remained stable, persistent stickiness indicated that disinflationary forces might be diminishing. The Fed reduced its target interest rate by 50 bps across two meetings, to a range of 4.25–4.50%, for a combined total of 100 bps of monetary easing in 2024. Fed Chair Powell noted that the Fed is “at or near a point at which it will be appropriate to slow the pace of further adjustments,” while updated estimates showed upward revisions to GDP and inflation for 2025. Similarly, the BoC lowered its target overnight rate by 100 bps in total during the fourth quarter across two meetings to 3.25%, but also signaled a more cautious approach from here. This level marked the high end of its estimated neutral range (2.25% - 3.25%). In 2024, the overnight rate was reduced by 175 bps. In Canada, two-year bond yields decreased significantly, while in the US, they remained nearly unchanged. Ten-year yields increased in both Canada and the US, with a more substantial rise observed in the US. Credit markets had a strong year. Corporate and provincial credit spreads tightened meaningfully over the period, particularly in the fourth quarter alongside positive risk sentiment. Demand for credit grew due to elevated yields and solid corporate earnings, and despite stretched valuations.

The Fund’s performance was positive for the year and outperformed the benchmark. Interest rate positioning contributed to performance, driven by duration positioning, the yield curve strategy, and a small exposure to real return bonds. Sector allocation benefited from credit spread tightening and from opportunistic positioning across the credit curve. Security selection detracted from performance driven by long positions in select US

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

media, broadcasting, and services companies. In particular, while the whole US media space experienced volatility during the period, long positions in two issuers, E.W. Scripps Company and iHeartMedia Inc., were especially impacted.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Leverage

Leverage occurs when the Fund borrows money or securities, or uses derivatives, to generate investment exposure that is greater than the amount invested.

The Fund's leverage is determined by calculating the aggregate exposure through the sum of following: (i) the market value of the Fund's short positions; (ii) the amount of cash borrowed for investment purposes; and (iii) the notional value of the Fund's specified derivatives positions excluding any specified derivatives used for hedging purposes. The Fund's exposure to leverage must not exceed 300% of the Fund's Net Asset Value ("NAV").

During the year ended December 31, 2024, the Fund's aggregate exposure to leverage ranged from 212.4% to 301.4% of the Fund's NAV. The aggregate exposure range to leverage was within the expected range as outlined in the simplified prospectus. As at December 31, 2024, the Fund's aggregate exposure was 257.2% of the Fund's NAV. The primary sources of leverage were short positions in fixed income securities, short positions in short-term investments, short bond futures and cash borrowing.

A component of the Fund's leverage is cash borrowing. Such facilities are repayable on demand. During the year ended December 31, 2024, the Fund's range of cash borrowing was \$Nil to \$6,233,466 with an average interest rate of 8.71%. As at December 31, 2024, cash borrowing represented 0.0% of the Fund's NAV.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Recent Developments

Despite the increased clarity following the election outcome, the macroeconomic landscape remains uncertain with a range of potential scenarios related to the policies of the incoming administration. This uncertainty is also closely tied to the actions of the Fed, as further monetary easing could lead to a resurgence in economic activity and inflation, while a prematurely hawkish stance could negatively impact market and business sentiment. Given recent persistent elevated inflation data, we anticipate a cautious approach from the Fed regarding policy easing. In Canada, economic activity is expected to materially lag behind that of the US, with 2024 GDP growth tracking at about 1.3%, which is roughly half of the forecasted growth rate of 2.8% for the US. There are also signs of upward price pressures to come from a weakening currency or the imposition of tariffs, though the specifics of potential tariffs remain unclear. Nevertheless, given the robust economic activity in the US and some evidence of stabilizing activity trends in Canada, we have lowered the likelihood of a recession in Canada. We will closely watch inflation trends, labour markets, and consumer activity (particularly in housing and other interest rate sensitive sectors) for any developments that will influence central bank decision-making.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Caution regarding forward-looking statements

Certain portions of this report, including, but not limited to, "Results of Operations" and "Recent Developments", may contain forward looking statements including, but not limited to, statements relating to the Fund, its strategy, risks, expected performance and condition. The use of any of the words "anticipate", "may", "will", "expect", "estimate", "should", "believe" and similar expressions are intended to identify forward-looking statements. In addition, any statement that is predictive in nature, that depends upon or refers to future events or conditions, or that may be made concerning future performance, strategies or prospects, and possible future action to be made by the Fund, the Manager and the Fund's portfolio manager, is also a forward-looking statement.

Such statements reflect the opinion of CFI and the Fund's portfolio manager, Connor, Clark & Lunn Investment Management Ltd., regarding factors that might be reasonably expected to affect the performance and the distributions on units of the Fund, and are based on current expectations and projections about future general economic, political and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, regulatory framework and the general business environment and other relevant information available at the time of this report. Changes in these factors may cause actual results to differ materially from the forward-looking information.

CFI believes that the expectations reflected in these forward-looking statements and in the analysis are reasonable, but no assurance can be given that these expectations or the analysis will prove to be correct and accordingly they should not be unduly relied on. These statements speak only as of the date of this report. Actual events and outcomes may differ materially from those described in these forward-looking statements.

We stress that the above mentioned list of important factors is not exhaustive. We encourage you to consider these and other factors carefully before making any investment decisions and we urge you to avoid placing any undue reliance on forward-looking statements. Further, you should know there is no specific intention of updating any forward-looking statements contained therein whether as a result of new information, future events or otherwise.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Related Party Transactions

CFI is affiliated with Connor, Clark & Lunn Financial Group Ltd. As disclosed in the prospectus, the portfolio manager retained by the Fund, Connor, Clark & Lunn Investment Management Ltd., is also affiliated with Connor, Clark & Lunn Financial Group Ltd. During the year ended December 31, 2024, no additions or deletions were made to the portfolio managers providing services to the Fund.

As Manager, CFI receives management and performance fees with respect to the day-to-day business and operations of the Fund as described in the section entitled “Management and Performance Fees”. These management and performance fees are charged in the normal course of business and are measured at their exchange amount, which approximates that of an arm’s length transaction.

Recommendations or reports by the Independent Review Committee

The Independent Review Committee tabled no special reports and made no reportable material recommendations to the manager of the Fund during the year ended December 31, 2024.

FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance since inception. This information is derived from the Fund's audited annual financial statements and previous audited financial statements.

The Fund's Net Assets Attributable to Holders of Redeemable Units per Unit

Series A	DEC 31, 24	DEC 31, 23	DEC 31, 22	DEC 31, 21	DEC 31, 20

Net asset value per unit	\$9.16	\$8.75	\$8.55	\$9.92	\$10.04

Series I inception date: February 15, 2019

(1) This information is provided as at December 31 of the years shown

(2) Management expense ratio is based on total expenses (excluding margin interest, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period

(3) The Manager of the Fund, CC&L Funds Inc., may waive certain fees or absorb certain expenses otherwise payable by the Fund. The amount of expenses waived or absorbed is determined periodically on a series by series basis at the discretion of the manager and the manager can terminate the waiver or absorption at any time.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

(5) The trading expense ratio represents margin interest, borrow fees on investments sold short, total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period

MANAGEMENT AND PERFORMANCE FEES

Management Fees

The Fund is managed by CFI. As consideration for providing investment advisory and management services, CFI receives a management fee from the Fund, based on the net asset value of the respective series, calculated daily and payable monthly in arrears. In respect of units of all series of the Fund other than Series I, the management fee is paid by the Portfolio to CFI. Management fees in respect of Series I units are arranged directly and charged outside the Portfolio. Management fees on Series I units are not expenses of the Portfolio. CFI uses a portion of management fees to pay for trailing commissions to registered dealers (if applicable) based on amounts invested in the Fund. CFI uses the remaining portion of the management fees to pay for investment advice, including fees charged by the Fund's portfolio manager, and general administration expenses and retains the balance for profit. The following table summarizes the annual management fee rates (excluding GST and HST) of each series of the Fund, expressed as a percentage of the Fund's value, and the portion used for dealer compensation and the portion used for or attributed to investment advice, general administration and profit.

	<u>As a percentage of management fees</u>		
	Annual Rates	Dealer Compensation	Investment advice, administration and profit
Series A	1.45%	68.97%	31.03%
Series F	0.45%	0.00%	100.00%
Series I	0.00%	0.00%	0.00%

Performance Fees

The Fund pays a quarterly performance fee to the Manager, calculated and accrued daily. The performance fee is based on the performance of a Series of the Fund relative to the performance of the Fund's hurdle and is equal to 15% of the amount by which the Fund outperforms the hurdle. The performance fee is applicable to Series A and Series F units. Unitholders of Series I units may negotiate a performance fee to be paid by the investor directly to the Manager. The FTSE Canada 91 Day T-bill Index return is the hurdle for the Fund

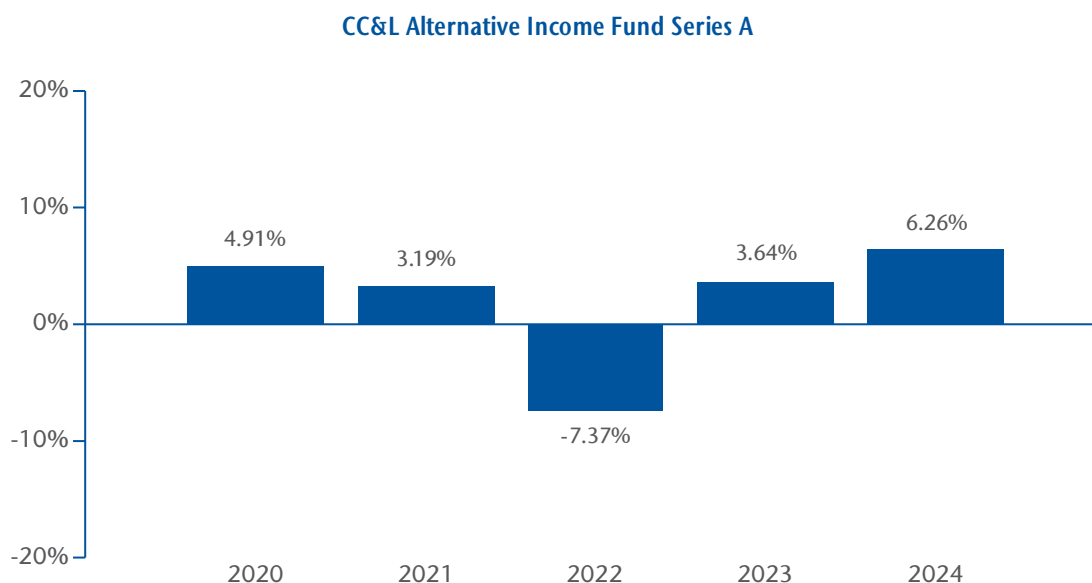

PAST PERFORMANCE - CC&L ALTERNATIVE INCOME FUND SERIES A

Past Performance

The performance information shown below assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-year Returns

The following bar charts show the Fund's annual performance for each of the years shown and for the twelve-month period ended December 31, 2024 and illustrate how the Fund's performance has changed from period to period. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

PAST PERFORMANCE - CC&L ALTERNATIVE INCOME FUND SERIES F

Past Performance

The performance information shown below assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-year Returns

The following bar charts show the Fund's annual performance for each of the years shown and for the twelve-month period ended December 31, 2024 and illustrate how the Fund's performance has changed from period to period. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

PAST PERFORMANCE - CC&L ALTERNATIVE INCOME FUND SERIES I

Past Performance

The performance information shown below assumes that all distributions made by the Fund in the periods shown were reinvested in additional units of the Fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-year Returns

The following bar charts show the Fund's annual performance for each of the years shown and for the twelve-month period ended December 31, 2024 and illustrate how the Fund's performance has changed from period to period. The charts show, in percentage terms, how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period.

PAST PERFORMANCE

Annual Compound Returns

The table below shows past performance for the last one, three, five and ten year financial periods, as applicable, for each series of the Fund, relative to the performance of relevant broad-based securities market index during the same periods.

CC&L Alternative Income Fund	1 Year	3 Year	5 Year	10 Year	Since Inception	Inception Date
CC&L Alternative Income Fund Series A	6.26%	0.66%	2.00%	-	1.97%	May-31-19
Benchmark *	4.92%	3.81%	2.48%	-	2.39%	May-31-19
CC&L Alternative Income Fund Series F	7.36%	1.74%	3.20%	-	3.08%	May-31-19
Benchmark *	4.92%	3.81%	2.48%	-	2.39%	May-31-19
CC&L Alternative Income Fund Series I	7.96%	2.32%	4.16%	-	4.10%	May-31-19
Benchmark *	4.92%	3.81%	2.48%	-	2.39%	May-31-19

* The benchmark is FTSE Canada 91 Day TBill Index in Canadian Dollars. Index from May 2019.

PAST PERFORMANCE

The following bar chart shows the performance of the Fund's long and short portfolio positions for the period from January 1, 2024 to December 31, 2024 before deducting fees and expenses and before the impact of other assets less liabilities.

SUMMARY OF INVESTMENT PORTFOLIO

Below is a breakdown of the Fund's investment holdings as at December 31, 2024. The individual holdings and their relative percentage of the overall fund will change between reporting periods as markets change and the portfolio manager buys and sells individual securities
